Observation · Frayer & doodle notes

Name _____ Partner _____

SECTION A BUILD THE WORD

Focus word **Observation**

From Section A: Observation, Model, Prediction, Testable question. For a different word, use the second box to explain how you recognize it.

Meaning in my words Explain it without using the term.	**How can you tell?** What did someone actually see or measure?
Example or sketch Draw and label a case that fits.	**Non-example and why** Show a near miss. What rules it out?

SECTION B DOODLE THE IDEA

Draw three observed positions and one predicted position. Build a key that separates the two.

Choose zero, direction, and scale.

My marks mean _____

On assignment: Observation

SECTION E / BACK / FINAL MEETING ONLY Name _____

Three telescope fixes are at 2, 4 and 6 km at minutes 0, 1 and 2. The night crew has one more exposure.

PICK A JOB / DELIVER ONE PRODUCT

☐ **Telescope scheduler**

Mark where to aim at minute 3. Tell the operator which dots were measured and which dot is your prediction.

☐ **Science broadcaster**

Give a two-sentence update to viewers. Point to a measured dot and say what the camera should see next if the pattern holds.

One partner makes the graphic; one delivers the first call. Show your evidence to the crew or the audience.

OUR GRAPHIC / COMMAND OR ON-AIR CUE

INCOMING UPDATE / WAIT FOR YOUR TEACHER

Listen to the new report. Switch speakers. Keep or change your call; point to the new evidence.
