Displacement · Frayer & doodle notes

Name _____ Partner _____

SECTION A BUILD THE WORD

Focus word **Displacement**

From Section A: Position, Distance, Displacement, Scalar / vector. For a different word, use the second box to explain how you recognize it.

Meaning in my words Explain it without using the term.	**How can you tell?** The cart turns around. Which two positions do you need to find its displacement?
Example or sketch Draw and label a case that fits.	**Non-example and why** Show a near miss. What rules it out?

SECTION B DOODLE THE IDEA

Put start, turn, and finish on a number line. Label distance on the path and displacement on the shortcut.

Choose zero, direction, and scale.

My marks mean _____

On assignment: Displacement

SECTION E / BACK / FINAL MEETING ONLY Name _____

A survey rover tracks XJ's model from +2 to +8 to +5 km. Dispatch needs both mileage and final location.

PICK A JOB / DELIVER ONE PRODUCT

☐ **Route engineer**

Draw the two legs for the mileage log and a single arrow for the return crew. Give dispatch the two different numbers.

☐ **Radio dispatcher**

Guide a new driver to the finish. Give the trip length, then its change in position, and tell the driver which number locates the finish from the start.

One partner makes the graphic; one delivers the first call. Show your evidence to the crew or the audience.

OUR GRAPHIC / COMMAND OR ON-AIR CUE

INCOMING UPDATE / WAIT FOR YOUR TEACHER

Listen to the new report. Switch speakers. Keep or change your call; point to the new evidence.
