Inertia · Frayer & doodle notes

Name _____ Partner _____

SECTION A BUILD THE WORD

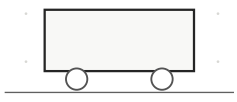

Focus word **Inertia**

From Section A: Force, Net force, Newton's 1st law, Inertia. For a different word, use the second box to explain how you recognize it.

Meaning in my words Explain it without using the term.	**How can you tell?** An empty cart and a loaded cart start at rest. The same net force pushes each for one second. Which gains less speed? Why?
Example or sketch Draw and label a case that fits.	**Non-example and why** Show a near miss. What rules it out?

SECTION B DOODLE THE IDEA

Draw a moving cart with balanced force arrows in orange and its separate velocity arrow in purple.

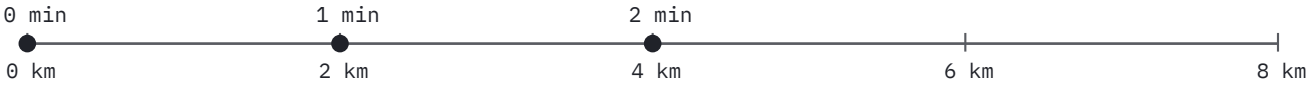

My marks mean _____

One camera. Which window?

SECTION E / BACK / FINAL MEETING ONLY Name _____

XJ is drifting right. Tracker fixes: 0 min → 0 km; 1 min → +2 km; 2 min → +4 km. At minute 3, one camera can aim at only one window: A +4, B +6 or C +8 km.

PICK A JOB / DELIVER ONE PRODUCT

☐ **Tracking engineer**

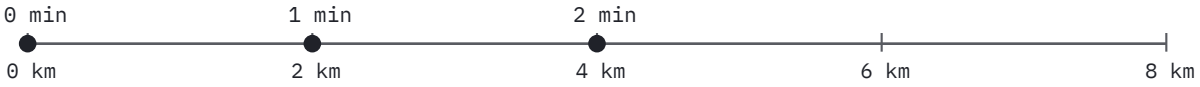

Draw the predicted fix. Radio the operator: “At minute 3, aim at window ___.” Use the spacing and the purple velocity arrow to explain your call.

☐ **Live science broadcaster**

Deliver a 15-second update: tell viewers which window to watch. A caller asks, “No engine? Why won’t it stop?” Use your cart drawing to answer on air.

One partner makes the graphic; one delivers the first call. Show your evidence to the crew or the audience.

OUR GRAPHIC / COMMAND OR ON-AIR CUE

INCOMING UPDATE / WAIT FOR YOUR TEACHER

Listen to the new report. Switch speakers. Keep or change your call; point to the new evidence.
