Interaction pair · Frayer & doodle notes

Name _____ Partner _____

SECTION A BUILD THE WORD

Focus word **Interaction pair**

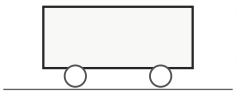

From Section A: Interaction pair, Equal and opposite, Force receiver, Mass and acceleration. For a different word, use the second box to explain how you recognize it.

Meaning in my words Explain it without using the term.	**How can you tell?** Earth pulls on an apple. Who pulls on whom in the other half of the pair?
Example or sketch Draw and label a case that fits.	**Non-example and why** Show a near miss. What rules it out?

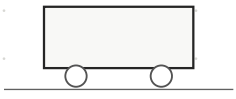

SECTION B DOODLE THE IDEA

Label both receivers first. Draw equal force arrows on different objects, pointing toward one another for gravity.

Receiver A

Receiver B

My marks mean _____

On assignment: Interaction pair

SECTION E / BACK / FINAL MEETING ONLY Name _____

Earth pulls on XJ. A public animation shows both gravitational arrows on XJ, with the caption “they cancel.”

PICK A JOB / DELIVER ONE PRODUCT

☐ **Simulation engineer**

Build two object panels. Put each gravitational arrow on its receiver so the animator can render the two motions.

☐ **Science graphics producer**

Prepare a split-screen caption: name who pulls whom and explain why equal force does not mean equal acceleration.

One partner makes the graphic; one delivers the first call. Show your evidence to the crew or the audience.

OUR GRAPHIC / COMMAND OR ON-AIR CUE

INCOMING UPDATE / WAIT FOR YOUR TEACHER

Listen to the new report. Switch speakers. Keep or change your call; point to the new evidence.
