Constant net force · Frayer & doodle notes

Name _____ Partner _____

SECTION A BUILD THE WORD

Focus word Constant net force

From Section A: Force and motion, Constant net force, Zero net force, Range. For a different word, use the second box to explain how you recognize it.

Meaning in my words Explain it without using the term.	**How can you tell?** A cart's mass stays the same. If its net force stays the same in size and direction, what else stays the same?
Example or sketch Draw and label a case that fits.	**Non-example and why** Show a near miss. What rules it out?

SECTION B DOODLE THE IDEA

Build a four-frame chain from force to position. Add the missing inputs and units beside the arrows.

force → acceleration → velocity → position

My marks mean _____

On assignment: Constant net force

SECTION E / BACK / FINAL MEETING ONLY Name _____

A telescope manager wants a final position. The telemetry feed contains net force and mass, but no starting velocity, starting position or elapsed time.

PICK A JOB / DELIVER ONE PRODUCT

☐ **Mission systems engineer**

Mark which part of the forecast you can release now. Send the operator a request for the missing measurements.

☐ **News assignment editor**

Prepare a “known / still needed” graphic. Tell the anchor which result can be reported now and which must wait.

One partner makes the graphic; one delivers the first call. Show your evidence to the crew or the audience.

OUR GRAPHIC / COMMAND OR ON-AIR CUE

INCOMING UPDATE / WAIT FOR YOUR TEACHER

Listen to the new report. Switch speakers. Keep or change your call; point to the new evidence.
