Signed area · Frayer & doodle notes

Name _____ Partner _____

SECTION A BUILD THE WORD

Focus word **Signed area**

From Section A: Signed area, Distance, Component, Angle □. For a different word, use the second box to explain how you recognize it.

Meaning in my words Explain it without using the term.	**How can you tell?** On a velocity–time graph, how can you tell which area to subtract?
Example or sketch Draw and label a case that fits.	**Non-example and why** Show a near miss. What rules it out?

SECTION B DOODLE THE IDEA

Draw and shade opposite-side rectangles. Put m/s on the vertical and s on the horizontal axis.

My marks mean _____

On assignment: Signed area

SECTION E / BACK / FINAL MEETING ONLY Name _____

A moving camera follows a model at +3 km/s for 2 s, then −1 km/s for 2 s. The editor needs the end location and the total footage distance.

PICK A JOB / DELIVER ONE PRODUCT

☐ **Tracking engineer**

Shade both parts of a velocity graph. Give the camera operator the final change from start, including direction.

☐ **Replay producer**

Storyboard the outbound and return shots. Tell the editor total distance and net movement; mark which part plays in reverse direction.

One partner makes the graphic; one delivers the first call. Show your evidence to the crew or the audience.

OUR GRAPHIC / COMMAND OR ON-AIR CUE

INCOMING UPDATE / WAIT FOR YOUR TEACHER

Listen to the new report. Switch speakers. Keep or change your call; point to the new evidence.

Editor's check: Turn the axis ninety degrees. Explain why transverse velocity needs its own graph.
