Driving force · Frayer & doodle notes

Name _____ Partner _____

SECTION A BUILD THE WORD

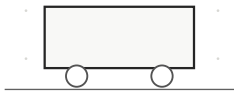

Focus word **Driving force**

From Section A: Driving force, Net force, Slope, Friction offset. For a different word, use the second box to explain how you recognize it.

Meaning in my words	How can you tell?
Explain it without using the term.	A rope pulls a crate while friction acts against it. Which arrow shows the driving force?
Example or sketch	**Non-example and why**
Draw and label a case that fits.	Show a near miss. What rules it out?

SECTION B DOODLE THE IDEA

Sketch the pull and opposing friction. Label driving force on one arrow and net force on a separate arrow.

My marks mean _____

On assignment: Driving force

SECTION E / BACK / FINAL MEETING ONLY Name _____

A rehearsal uses the same asteroid model twice. The second net push is twice the first, for the same time. Operations needs a comparison.

PICK A JOB / DELIVER ONE PRODUCT

☐ **Flight-test engineer**

Draw two net-force arrows and two velocity-change arrows. Recommend the stronger change and state what you kept fixed.

☐ **Test-range broadcaster**

Tell viewers which run changes velocity more. Ask your producer whether doubling a motor's pull always doubles net force.

One partner makes the graphic; one delivers the first call. Show your evidence to the crew or the audience.

OUR GRAPHIC / COMMAND OR ON-AIR CUE

INCOMING UPDATE / WAIT FOR YOUR TEACHER

Listen to the new report. Switch speakers. Keep or change your call; point to the new evidence.

Editor's check: Distinguish a doubled applied force from a doubled net force.
