Static friction · Frayer & doodle notes

Name _____ Partner _____

SECTION A BUILD THE WORD

Focus word **Static friction**

From Section A: Static friction, Limit, Kinetic friction, Normal force. For a different word, use the second box to explain how you recognize it.

Meaning in my words	How can you tell?
Explain it without using the term.	You push a crate sideways and it stays still. What is happening where the surfaces touch?
Example or sketch	**Non-example and why**
Draw and label a case that fits.	Show a near miss. What rules it out?

SECTION B DOODLE THE IDEA

Sketch a force trace. Label the peak just before slip and the steady-speed pull while the surfaces slide.

My marks mean _____

On assignment: Static friction

SECTION E / BACK / FINAL MEETING ONLY Name _____

A show cuts from a block sliding on a rough table to XJ coasting in empty space. The proposed caption says “Both will stop from surface friction.”

PICK A JOB / DELIVER ONE PRODUCT

☐ **Effects engineer**

Specify the friction setting for each scene. Mark the contact surfaces, then tell the animator which motion needs another force to change.

☐ **Science broadcaster**

Record a correction for the cut. Your producer points to the surfaces in each scene and asks what could still bend XJ’s path.

One partner makes the graphic; one delivers the first call. Show your evidence to the crew or the audience.

OUR GRAPHIC / COMMAND OR ON-AIR CUE

INCOMING UPDATE / WAIT FOR YOUR TEACHER

Listen to the new report. Switch speakers. Keep or change your call; point to the new evidence.

Editor’s check: Explain how entering an atmosphere would change the force model.
