Find the first step that changes the story

GUIDED NOTES / use with the projected diagram Name _____

A SAY THE WORD

Sign / ES: signo / PT: sinal

Direction uses signs; speed is a size.

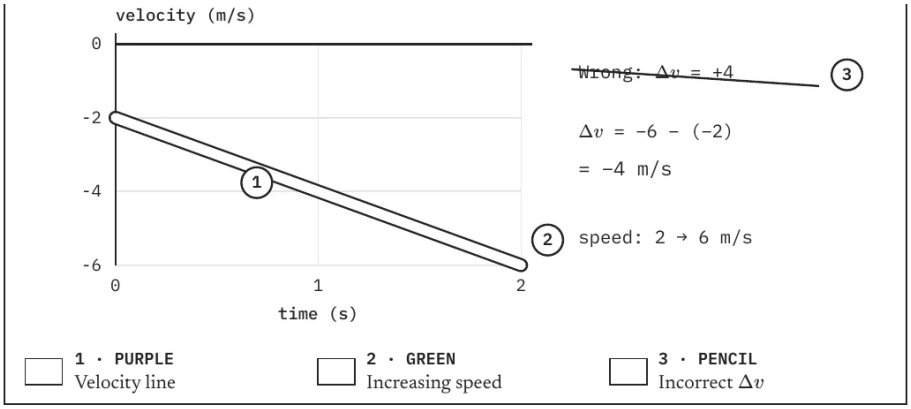

Also on your note page: Quantity, Force, Check.

B READ THE RELATIONSHIP

Find the first wrong step, repair it, then recheck

As you read, find: first error · repair · check.

C TRACE THE ORIGINAL FIGURE

Use the numbered key. Trace one feature. Tell your partner what it means.

D FOLLOW THE WORKED EXAMPLE

A 3 kg cart has 9 N right and 3 N left. Someone writes a = 9/3 = 3 m/s² . Explain and repair the first wrong step.

Given m = 3 kg right is + forces: +9 N and −3 N

Rule Use net force, not the largest force.

Work $\Sigma F_x = 9 - 3 = +6$ N $a_x = 6/3 = +2$ m/s²

Answer +2 m/s² Check: ma = 6 N .

E SAVE FOR THE FINAL MEETING

Before the fictional XJ forecast is shared, check its signs, units, starting coordinates and force sums. Repairing the first wrong step can change every later result.

Read the physics: Sign

SUPPORTED READING / read one part, then point to the evidence Name _____

01 PICTURE IT

Write the positive direction first. Find the first step where the model, sign or starting value went wrong. Changing only the final number can hide the mistake.

02 HOW IT WORKS

When forces oppose, give them opposite signs before adding. When reading velocity, compare its size to tell whether speed grows. A more negative velocity can mean a larger speed.

03 WHAT TO CHECK

Repair the first wrong step. Then use a sketch, force sum or unit check to test the new reasoning.

04 TRY THE EXAMPLE FROM YOUR NOTES

A 3 kg cart has 9 N right and 3 N left. Someone writes $a = 9/3 = 3\ m/s^2$. Explain and repair the first wrong step. $+2\ m/s^2$ Check: $ma = 6\ N$.

Model check: Find the first wrong step, repair it, then recheck.

05 CONNECT TO XJ

Before the fictional XJ forecast is shared, check its signs, units, starting coordinates and force sums. Repairing the first wrong step can change every later result.

SAY IT BEFORE YOU WRITE

What failed first: the rule, the sign or the arithmetic? The first error was ___. I replaced it with ___ because ___.

Build the word. Draw the idea.

STUDENT CHOICE / FRONT / OPENING MEETING Name _____

A FRAYER MODEL

Sign / ES: signo / PT: sinal

Say it in any language. Draw or use a few words. Use the notes to check your idea.

Meaning	How can you tell?
To me, sign means …	If right is positive, how do you record a 3 N force to the left? I record ___ N because the force points ___.
Example or sketch	**Non-example**
I see it when …	This looks close, but …

B DRAW WITH YOUR TEACHER

Draw a force sum that includes a leftward force. Circle the first place where losing the sign would change your answer.

Labels you can use: first error · repair · check.

First wrong step	Repair

Tell a partner: The first error was ___. I replaced it with ___ because ___.

On assignment: Sign

SECTION E / BACK / FINAL MEETING ONLY Name _____

A calculator overlay for a 3 kg tracker shows +9 N and −3 N. Its output is "9 ÷ 3 = 3 m/s².” It is about to go live.

PICK A JOB / DELIVER ONE PRODUCT

☐ **Software tester**

File a bug ticket: mark the first wrong step, enter the corrected force sum and give the expected display.

☐ **Fact-check producer**

Stop or clear the graphic. Give the anchor a corrected number and a short reason viewers can check on the force arrows.

Word bank: first error · repair · check.

Try: “Our desk recommends ___. This mark shows ___.”

One partner makes the graphic; one delivers the first call. Show your evidence to the crew or the audience.

OUR GRAPHIC / COMMAND OR ON-AIR CUE

INCOMING UPDATE / WAIT FOR YOUR TEACHER

Listen to the new report. Switch speakers. Keep or change your call; point to the new evidence.

“We first said ___. Now we ___ because ___.”

Editor’s check: Give a new pair of forces that exposes the same error.
