Revision · Frayer & doodle notes

Name _____ Partner _____

SECTION A BUILD THE WORD

Focus word **Revision**

From Section A: Prediction, Evidence, Limit, Revision. For a different word, use the second box to explain how you recognize it.

Meaning in my words Explain it without using the term.	**How can you tell?** A new sighting changes your forecast. Which result changes, and what new evidence explains it?
Example or sketch Draw and label a case that fits.	**Non-example and why** Show a near miss. What rules it out?

SECTION B DOODLE THE IDEA

Doodle two forecast bands on the same scale. Add a note connecting the revision to a specific measurement.

Choose zero, direction, and scale.

My marks mean _____

On assignment: Revision

SECTION E / BACK / FINAL MEETING ONLY Name _____

Two short-interval forecasts in the same frame give 4–6 km and 5–7 km. The new estimate uses a later sighting. A headline says “Impact confirmed.”

PICK A JOB / DELIVER ONE PRODUCT

☐ **Forecast engineer**

Overlay the two bands. Issue a revised location bulletin and name what observation would trigger another update.

☐ **Science news editor**

Decide whether to air the headline. Build a graphic with both intervals and write the replacement line you will use.

One partner makes the graphic; one delivers the first call. Show your evidence to the crew or the audience.

OUR GRAPHIC / COMMAND OR ON-AIR CUE

INCOMING UPDATE / WAIT FOR YOUR TEACHER

Listen to the new report. Switch speakers. Keep or change your call; point to the new evidence.

Editor’s check: Separate the physics forecast from a decision about action.
