Turn a holder into a reproducible pattern

Task 1.2–1.3 / Prepare and draw

Name _____ Team _____ Date _____

01 Set up the investigation

Use solid outlines for cuts and dashed lines for folds. Pair a front view and side view with a flat pattern. Label all critical dimensions and units.

Measure a flat pattern and the usable sheet. Mark cut and fold lines differently.

Stock length × width	Pattern area	Area-only estimate	Whole patterns fitted
Sheet 1			
Revised layout			

02 Plan it on paper

Draw front and side views. Include width, height, and the opening. Mark which view supplies each measurement.

My prediction, chosen feature or design limit

Turn a holder into a reproducible pattern

Task 1.2–1.3 / Test, compare and explain

Name _____ Team _____ Date _____

03 Run the test and record what happened

Fit copies of the pattern on one sheet without overlap. Count whole parts and compare with an area-only estimate. Give your views to a partner. Ask them to locate a fold and one hidden dimension. Correct any ambiguity.

Feature	Partner's reading	Correction to view or dimension
Fold position		
Hidden dimension		

04 Use the reading

Ch. 3 | Designs That Take Flight | printed pp. 19-26

Ch. 4 | Beyond Words | printed pp. 27-34

Complete the assigned checks in the interactive reader. Here, identify a page and one idea that helps explain your result or design decision.

05 Individual explanation

Show the number of whole parts per sheet. Explain one reason it can differ from the area estimate.

Keep these sheets with the work. Save the individual explanation in the lesson’s Explain step.
