Transfer task: make a plan

LEARNING TARGET I can organize the assigned evidence and begin a defensible prediction.

A · KEY VOCABULARY

Reference point	The zero everything is measured from. Mark it on your sketch.
Given	Every value copied with its unit.
Model assumption	State it: steady velocity or constant acceleration.
Range	Read the lower and upper values before making a claim.

B · KEY HABIT + TOOLS

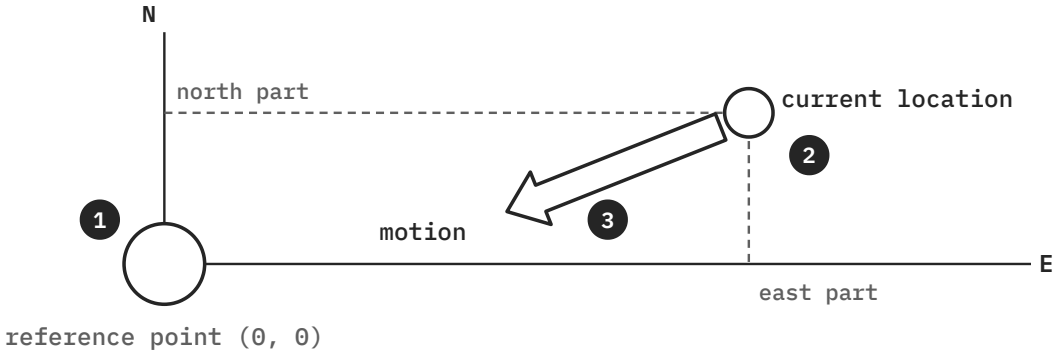

quantity → numbers + units → result

$$x_f = x_i + v \times t$$
$$v_f = v_i + a \times t$$

one line one quantity
E–W, N–S solve separately

C · COLOR IT · MAKE THE SITUATION VISIBLE

Your sketch needs all three.

- ☐ **1 · PENCIL** Reference point
- ☐ **2 · BLUE** Current location
- ☐ **3 · PURPLE** Motion direction

D · WORKED EXAMPLE

Check a prediction: an object starts at 2 m and moves at a steady +3 m/s for 4 s.

GIVEN	EQUATION	WORK	ANSWER
$x_i = 2$ m $v = +3$ m/s $t = 4$ s · steady v	$x_f = x_i + v \times t$	change $= 3 \times 4 = +12$ m $x_f = 2 + 12$	**14 m** check: direction + size + start

E · THE 2026-XJ THREAD

DAY 21 OF 22 · NEW TOOL: YOUR PLAN

Now it's your forecast. Pick the evidence on XJ that matters, choose a model, and plan the calculation that answers the unit question.

Unit question: How fast is it moving, and where will it arrive?

UNIT 1 COLOR CODE ☐ green speeding up ☐ red slowing down ☐ yellow steady · balanced ☐ blue position · displacement ☐ purple velocity ☐ orange forces pencil · everything else
