Spring potential energy

antocciphysics

Name: _____ **Block:** _____ (teacher only) **Mastery Rating:** _____

LEARNING TARGET Calculate stored spring energy and distinguish it from force.

SUCCESS CRITERIA - I can...

1. Use displacement in meters.
2. Apply the squared relationship for spring energy.
3. Explain how stored energy can become motion.

Core: teacher selects from 1-7. **Stretch:** 8 after checking your work.

MARZANO SELF-CHECK

① Need help starting

② Can do part; need help

③ Solve and explain with allowed supports

01 Warm-up: bring back an earlier idea

A pendulum loses **15 J** gravitational energy while descending. Neglect losses. **Find its kinetic-energy gain**.

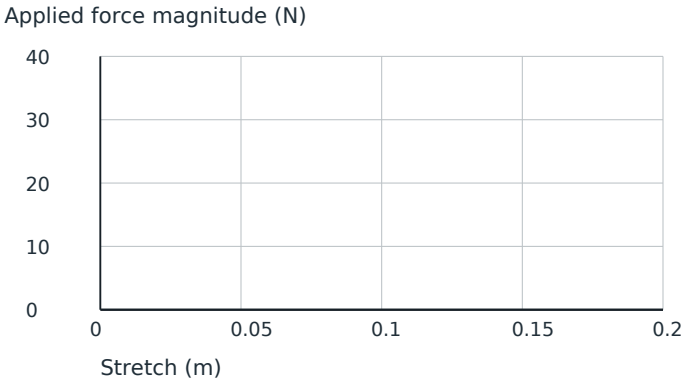

Marzano check - circle: ① ② ③

02 Worked example: explain the prediction

Reference: $U_s = \frac{1}{2}kx^2$; $|F_{spring}| = k|x|$.
s means spring. Compression and stretch both store energy relative to the natural length; energy and force are different quantities.

Worked reasoning: A spring with k=**200 N/m** stretched **0.10 m** stores $\frac{1}{2}kx^2$=**1 J**. Doubling stretch to **0.20 m** stores **4 J**, not **2 J**.

Your turn: Draw force-versus-stretch triangles and **compare their areas**.

Marzano check - circle: ① ② ③

03 Read and explain the diagram or equation

The same spring is displaced x and **2** x. **Compare stored energies** and force magnitudes.

Mark equilibrium and displacement x.

The zigzag is the spring; the rectangle is the attached block.

Marzano check - circle: ① ② ③

04 Apply the physics

1. Use k=**100 N/m** and x=**0.20 m**.
2. **Find x²**, then U=½×**100**×x².

Mark equilibrium and displacement x.

Marzano check - circle: ① ② ③

Spring potential energy

antocciphysics

Continue down each column.

05 Explain your reasoning

Why is energy positive for both positive and negative x even though spring force reverses?

Marzano check - circle: ① ② ③

06 Review: connect an earlier idea

A **4 N** friction force opposes a **6 m** displacement. **Find work**, including sign and units.
Label force and displacement, including their relative direction.

Add force and displacement arrows; label the angle.

Force: ____ N Displacement: ____ m

Marzano check - circle: ① ② ③

07 Exit check

A spring stores **3 J** at a certain compression. **How much** does it store at double compression?

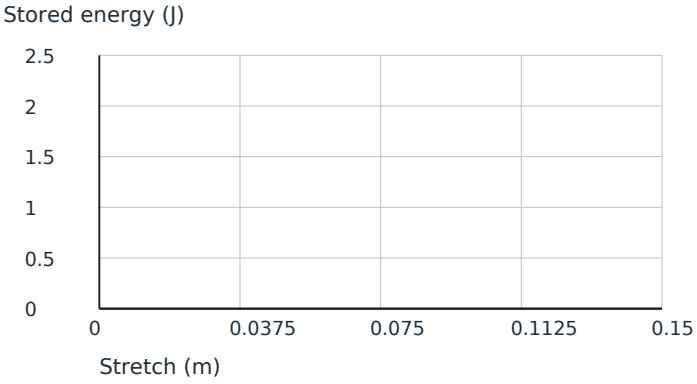

Mark equilibrium and displacement x.

Marzano check - circle: ① ② ③

08 STRETCH: test the prediction

1. **Find the energy** for stretches **0.05**, **0.10**, **0.15 m** when k=**200 N/m**.
2. **Sketch the energy trend**.

Marzano check - circle: ① ② ③
