Electrical power and energy

antocciphysics

Name: _____ **Block:** _____ (teacher only) **Mastery Rating:** _____

LEARNING TARGET Calculate electrical transfer rate and energy use.

SUCCESS CRITERIA - I can...

1. Use P=IV with watts, amps and volts.
2. Use E=Pt with seconds for joules.
3. Distinguish power from total energy.

Core: teacher selects from 1-7. **Stretch:** 8 after checking your work.

MARZANO SELF-CHECK

① Need help starting

② Can do part; need help

③ Solve and explain with allowed supports

LANGUAGE GOAL Use “power” and “voltage” to explain your answer. Sentence starters are optional.

power: rate of energy transfer

voltage: electric potential difference; energy transferred per charge

current: rate of charge flow

01 Warm-up: bring back an earlier idea

Two equal **10 Ω** resistors are connected in parallel. **Find equivalent resistance**, then compare with a series connection of the same pair.

Sentence starter: Both … . They differ in … because … .

Marzano check - circle: ① ② ③

02 Worked example: explain the prediction

Reference: P = IV; E = PΔt; P = I²R = V²/R.
Constant power for E = PΔt; last equalities apply to an ohmic resistor.

Worked reasoning: A device at **6 V** drawing **2 A** receives power VI=**12 W**. Over **5 s** it receives **60 J**. Power is an energy-transfer rate.

Your turn: Draw an input-energy arrow and **label voltage**, current, power and elapsed time with distinct units.

Sentence starter: In my work, I used … to show … . I labeled it … .

Draw and label all energy transfers across the boundary.

Chosen system

Stored energy change: _____ J

Marzano check - circle: ① ② ③

03 Read and explain the diagram or equation

Two motors use the same energy but one takes half the time. **Compare average power**.

Sentence starter: Both … . They differ in … because … .

Draw and label all energy transfers across the boundary.

Chosen system

Stored energy change: _____ J

Marzano check - circle: ① ② ③

04 Apply the physics

A **12 V** device draws a steady **0.75 A** for **4 minutes**.
1. **Calculate input power** and total electrical energy in joules.
2. **Label the diagram of the** objects you are studying and **show the time conversion**.

Sentence starter: I found … [unit]. This value means … in this situation.

Draw and label all energy transfers across the boundary.

Chosen system

Stored energy change: _____ J

Marzano check - circle: ① ② ③

Electrical power and energy

antocciphysics

Continue down each column.

Sentence starters are optional. You may plan in any language.

05 Explain your reasoning

A student says a **10 W** motor always uses more energy than a **5 W** motor. Supply a time comparison that disproves this.

Sentence starter: I notice ... . This supports ... because ... .

Marzano check - circle: 1 2 3

06 Review: connect an earlier idea

A simplified shallow-water calculation uses v=√(gh). With g=**10**, h=**40 m** and travel distance **6 km**, find speed and travel time. **State a part of the** explanation that may not fit **what happens**.
Label a wave sketch to **support the calculation or comparison**.

Word help: wave = a disturbance that can carry energy and information

Sentence starter: For this answer, I treated ... as true. I found ... . This supports ... because ... .

Time or position: choose and label

Marzano check - circle: 1 2 3

07 Exit check

A **6 Ω** resistor carries **2 A**. **Find its power** using two equivalent equations.

Sentence starter: I found ... [unit]. This value means ... in this situation.

Draw and label all energy transfers across the boundary.

Chosen system

Stored energy change: _____ J

Marzano check - circle: 1 2 3

08 STRETCH: test the prediction

A **12 V** motor draws **1.5 A** for **40 s** and delivers **432 J** of useful mechanical energy. **Find electrical input energy**, average useful power and efficiency.

Sentence starter: I found ... [unit]. This value means ... in this situation.

Draw and label all energy transfers across the boundary.

Chosen system

Stored energy change: _____ J

Marzano check - circle: 1 2 3
