Transfer task: defend and revise

antocciphysics

Name: _____ **Block:** _____ (teacher only) **Mastery Rating:** _____

LEARNING TARGET Defend the prediction with evidence and make a visible, justified revision.

SUCCESS CRITERIA - I can...

1. Graph the central prediction and coordinate bounds.
2. Defend a claim using calculations and model limits.
3. Document a specific revision with evidence.

Core: teacher selects from 1-7. **Stretch:** 8 after checking your work.

MARZANO SELF-CHECK

① Need help starting

② Can do part; need help

③ Solve and explain with allowed supports

LANGUAGE GOAL Use “evidence” and “revision” to explain your model or result. Sentence starters are optional.

evidence: observations or measurements that support an idea

revision: a change made after checking evidence or reasoning

prediction: what a model says may happen next

01 Warm-up: bring back an earlier idea

For x_i=3±1 m, v=5±0.5 m/s and exact t=7 s, find the central final position and conservative interval.
Name a specific check of your method.

Word help: conservative bound = a limit chosen to include every allowed case

Sentence starter: I found ... [unit]. This value means ... in this situation.

Marzano check - circle: ① ② ③

02 Worked example: explain the model

Reference: $x_f = x_i + v_x t$; $y_f = y_i + v_y t$.
Use your Day 21 data and consistent units. Defend the endpoint and assumptions. A bounded range is not a probability.

Worked reasoning: A cart model predicts 12 m after 4 s; the observation is 10±0.5 m. Since 12 is outside 9.5-10.5 m, the model needs checking. The mismatch alone does not identify the cause.

Your turn: Mark the observed interval and prediction on a number line.
Name one model assumption to recheck.

Sentence starter: I predict ... . My model supports this because ... .

Position (m); right is positive

Marzano check - circle: ① ② ③

Read down the left column, then down the right. Use the open space to draw, calculate and explain.

Transfer task: defend and revise

antocciphysics

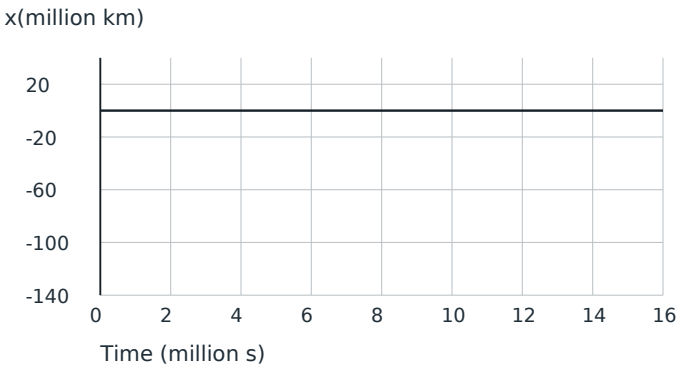

Continue down each column.

Sentence starters are optional. You may plan in any language.

03 Graph central and bounded positions

Use Day 21 Honors data. Graph central, lower and upper x(t) from 0 to 16 million seconds.
Use additional graph paper if needed.
Mark end point values and explain the changing width.

Sentence starter: Under the assumption ..., the evidence ... supports ... because ... .

Marzano check - circle: 1 2 3

04 Defend the public claim

Write an accessible paragraph with central end point, coordinate intervals, and the meaning of those bounds. Distinguish measurement uncertainty from constant-velocity model error.

Sentence starter: The step I would change is ... . The evidence is ... .

Explain to your audience	Evidence from your work
Predicted position	____
Range and meaning	____
Assumption / omitted effect	____

Marzano check - circle: 1 2 3

05 Peer defense and revision

Explain your method to a partner. Have them ask about units, axes, bounds or assumptions.
Record one question and one evidence-based revision. Keep the original visible. If alone, label a self-review.

Sentence starter: Under the assumption ..., the evidence ... supports ... because ... .

Step checked	Question or concern	Change or reason to keep
____	____	____

Marzano check - circle: 1 2 3

Transfer task: defend and revise

antocciphysics

Continue down each column.

Sentence starters are optional. You may plan in any language.

06 Review: connect an earlier idea

A 5 kg object hangs still from a vertical string.
Use g=9.8 N/kg.
Name all forces on it with sources, sizes and directions. Does object-on-string belong on this diagram?
Draw the forces on the chosen object and label their sources.

Sentence starter: The … in my model represents … . Its label shows … .

Add and label force arrows.

Marzano check - circle: ① ② ③

07 Exit check

Identify evidence for Science, Reasoning, Communication, and Transfer to asteroid from your finished work.
Name your most important revision and one next-unit question.

Sentence starter: I notice … . This supports … because … .

Criterion	Where your work shows it
Science / model	___
Reasoning	___
Communication / transfer	___

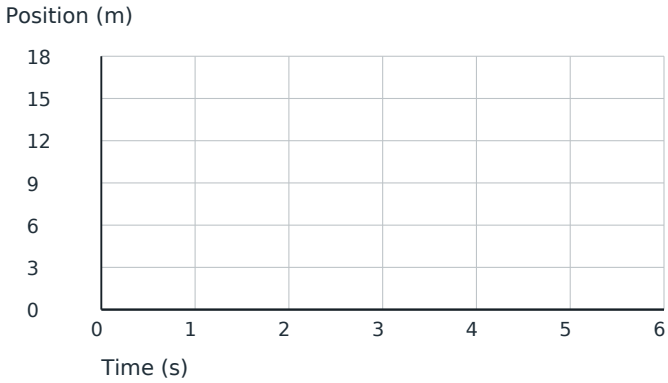

Marzano check - circle: ① ② ③

08 STRETCH: test the model

A class fits v=2.5 m/s using x=10 m at 4 s. It then measures x=13.0±0.2 m at 6 s. Evaluate the new evidence and propose a two-interval model consistent with the central measurements.

Word help: evaluate = check a claim against evidence and conditions

Sentence starter: I notice … . This supports … because … .

Marzano check - circle: ① ② ③
