Transfer task: defend and revise

antocciphysics

Name: _____ **Block:** _____ (teacher only) **Mastery Rating:** _____

LEARNING TARGET Defend the prediction with evidence and make a visible, justified revision.

SUCCESS CRITERIA - I can...

1. Graph the central prediction and coordinate bounds.
2. Defend a claim using calculations and model limits.
3. Document a specific revision with evidence.

Core: teacher selects from 1-7. **Stretch:** 8 after checking your work.

MARZANO SELF-CHECK

① Need help starting

② Can do part; need help

③ Solve and explain with allowed supports

01 Warm-up: bring back an earlier idea

For x_i=3±1 m, v=5±0.5 m/s and exact t=7 s, find the central final position and conservative interval. Name a specific check of your method.

Marzano check - circle: ① ② ③

02 Worked example: explain the model

Reference: $x_f = x_i + v_x t$; $y_f = y_i + v_y t$.
Use your Day 21 data and consistent units. Defend the endpoint and assumptions. A bounded range is not a probability.

Worked reasoning: A cart model predicts 12 m after 4 s; the observation is 10±0.5 m. Since 12 is outside 9.5-10.5 m, the model needs checking. The mismatch alone does not identify the cause.

Your turn: Mark the observed interval and prediction on a number line. Name one model assumption to recheck.

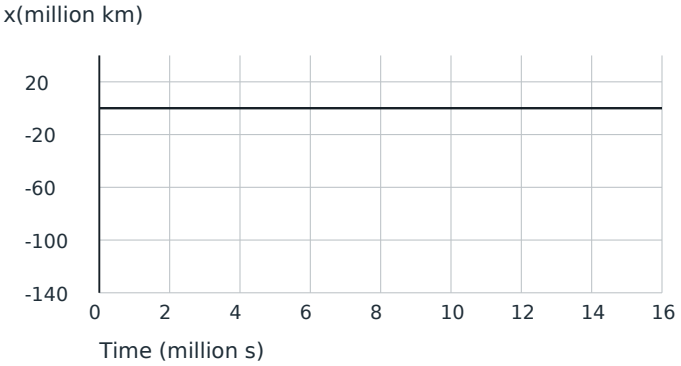

Position (m); right is positive

Marzano check - circle: ① ② ③

03 Graph central and bounded positions

Use Day 21 Honors data. Graph central, lower and upper x(t) from 0 to 16 million seconds. Use additional graph paper if needed. Mark end point values and explain the changing width.

Marzano check - circle: ① ② ③

04 Defend the public claim

Write an accessible paragraph with central end point, coordinate intervals, and the meaning of those bounds. Distinguish measurement uncertainty from constant-velocity model error.

Explain to your audience	Evidence from your work
Predicted position	____
Range and meaning	____
Assumption / omitted effect	____

Marzano check - circle: ① ② ③

Transfer task: defend and revise

antocciphysics

Continue down each column.

05 Peer defense and revision

Explain your method to a partner. Have them ask about units, axes, bounds or assumptions. Record one question and one evidence-based revision. Keep the original visible. If alone, label a self-review.

Step checked	Question or concern	Change or reason to keep
___	___	___

Marzano check - circle: ① ② ③

06 Review: connect an earlier idea

A 5 kg object hangs still from a vertical string. Use g=9.8 N/kg. Name all forces on it with sources, sizes and directions. Does object-on-string belong on this diagram? Draw the forces on the chosen object and label their sources.

Add and label force arrows.

Marzano check - circle: ① ② ③

07 Exit check

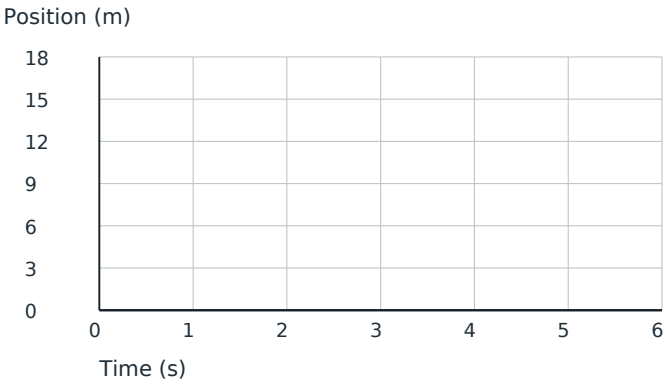

Identify evidence for Science, Reasoning, Communication, and Transfer to asteroid from your finished work. Name your most important revision and one next-unit question.

Criterion	Where your work shows it
Science / model	___
Reasoning	___
Communication / transfer	___

Marzano check - circle: ① ② ③

08 STRETCH: test the model

A class fits v=2.5 m/s using x=10 m at 4 s. It then measures x=13.0±0.2 m at 6 s. Evaluate the new evidence and propose a two-interval model consistent with the central measurements.

Marzano check - circle: ① ② ③
