Talk it through: inertia

Language goal: I can **explain** why things keep moving.

DIRECTIONS · Partner A and B read their lines aloud. Listen, then write. Switch each round.

ROUND 1 · A PUCK SLIDES ON ICE AFTER THE PUSH

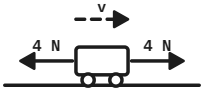

no push · keeps going

A ASKS "Why does the puck keep moving after the stick lets go?"

B SAYS "The net force is about ____, so its velocity stays ____. That is called ____."

A CHECKS "So you're saying nothing pushes it forward. I agree / disagree because ____."

ROUND 2 · SWITCH · A CART: 4 N RIGHT, 4 N LEFT, STILL MOVING

B ASKS "The forces are balanced. Why is the cart still moving?"

A SAYS "Balanced means the net force is ____. The cart keeps a ____ velocity."

B ADDS "I want to add that balanced does not mean ____."

ROUND 3 · BOTH · A 1 kg CART vs. A 3 kg CART

A "The ____ kg cart is harder to stop because it has more ____."

B "More mass means more inertia, so ____."

LISTENING LOG · MY PARTNER SAID…

NOW I WRITE IT MYSELF

Things keep moving because…

Stems: I agree because… · Can you say that again? · What does ___ mean? · I want to add…

UNIT 1 COLOR CODE ☐ green speeding up ☐ red slowing down ☐ yellow steady · balanced ☐ blue position · displacement ☐ purple velocity ☐ orange forces pencil · everything else

Three inertia myths are on the loose

09 Y

Fill each poster: the truth and evidence that proves it.

WANTED

FOR CRIMES AGAINST PHYSICS

"Moving things need a force to keep moving."

LAST SEEN: a puck sliding on ice

THE TRUTH:

EVIDENCE:

REWARD: NEWTON'S 1st LAW

WANTED

FOR CRIMES AGAINST PHYSICS

"Balanced forces mean nothing moves."

LAST SEEN: a car on cruise control

THE TRUTH:

EVIDENCE:

REWARD: CONSTANT VELOCITY

WANTED

FOR CRIMES AGAINST PHYSICS

"Heavier objects have less inertia."

LAST SEEN: pushing a full vs. empty cart

THE TRUTH:

EVIDENCE:

REWARD: MORE MASS

CAPTURED! · WRITE YOUR OWN WANTED NOTICE

A wrong idea about today's physics I once believed:

UNIT 1 COLOR CODE ☐ green speeding up ☐ red slowing down ☐ yellow steady · balanced
☐ blue position · displacement ☐ purple velocity ☐ orange forces pencil · everything else

The passenger, in six panels

09 E

DIRECTIONS · Draw the passenger in each panel. Add a velocity arrow and any force arrows. Fill each caption.

1 · CRUISING

Car + passenger at 15 m/s. Net force on passenger: _____

2 · BRAKES!

The car slows. The passenger keeps moving _____ .

3 · SEATBELT

The belt pushes the passenger _____ .

4 · STOPPED

Both at 0 m/s. Net force: _____

5 · GREEN LIGHT

The car speeds up. Passenger feels pushed _____ .

6 · THE TRUTH

Nothing pushed them back — their _____ resisted the change.

THE WHOLE STORY · v–t GRAPH FOR THE PASSENGER

WHY DOES 2026-XJ KEEP MOVING?

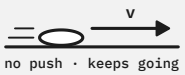

Use the words inertia, net force, and velocity.

UNIT 1 COLOR CODE ☐ green speeding up ☐ red slowing down ☐ yellow steady · balanced ☐ blue position · displacement ☐ purple velocity ☐ orange forces pencil · everything else

Picture dictionary: inertia

Language goal: I can **explain** why things keep moving.

HARD TO CHANGE

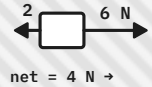

inertia

inercia · inércia

resisting a change in motion

my language: _____

use it: _____

net = 4 N →

→ + ← = 0

net force

fuerza neta · força resultante

all forces added up

my language: _____

use it: _____

net = 0

← 4 N 4 N →

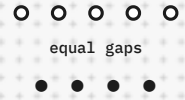

balanced

equilibrado · equilibrado

forces cancel: net = 0

my language: _____

use it: _____

constant velocity

velocidad constante · velocidade constante

same speed, same direction

my language: _____

use it: _____

kg

mass

masa · massa

how much matter + inertia

my language: _____

use it: _____

→ ← rub

friction

fricción · atrito

a force that slows sliding

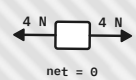

my language: _____

use it: _____

MATCH · WRITE THE WORD FOR EACH PICTURE

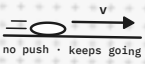

_____

_____

_____

_____

I can point and say all 6 words to a partner ☐

Fix the group chat

09 R

DIRECTIONS · Reply in the empty bubbles. Show your reasoning on the right.

XJ-7 tracking crew

ELI

engines off. so 2026-XJ will start slowing down now, right?

YOU ①

MAZ

but what keeps pushing it forward?

YOU ②

NADIA

test cart: pull 4 N right, friction 4 N left. it's moving. how??

YOU ③

ELI

ok which is harder to stop, a 1 kg or 3 kg cart at the same speed?

YOU ④

SHOW YOUR RECEIPTS

① 1st law: ΣF = 0 →

② no "force of motion"

③ balanced ≠ stopped

④ mass and inertia

R6 1 2 3

UNIT 1 COLOR CODE ☐ green speeding up ☐ red slowing down ☐ yellow steady · balanced
☐ blue position · displacement ☐ purple velocity ☐ orange forces pencil · everything else

Settle the argument: inertia

09 I

DIRECTIONS · Shade the bubble of the person who is right. Give evidence, then fix the wrong claim.

ROUND 1

ANA
"The puck slides because the push is still inside it."

BEN
"The push ended. With no net force, it keeps its velocity."

Who's right? _____ · Evidence: _____

Fixed claim: _____

ROUND 2

KAI
"Balanced forces mean the object must be stopped."

LU
"Balanced forces mean it's stopped OR moving at constant velocity."

Who's right? _____ · Evidence: _____

Fixed claim: _____

ROUND 3

MAYA
"Real carts slow down because motion naturally runs out."

RAJ
"Friction and air are forces. They slow the cart."

Who's right? _____ · Evidence: _____

Fixed claim: _____

YOUR TURN · WRITE A TRAP

Write a claim about today's idea that sounds right but is wrong. Trade and settle it.
