Transfer task: mission plan

Organize the assigned evidence. Your plan, your work.

21 A

STEP 1 · SKETCH THE SITUATION

Mark the reference point, current location, motion arrow, and east/north parts.

STEP 2 · GIVENS

QUANTITY	VALUE	UNIT

STEP 3 · MODEL ASSUMPTION

☐ steady velocity ☐ constant acceleration because ____

STEP 4 · FIRST CALCULATION (quantity → numbers + units → result)

STEP 5 · CHECK

☐ direction matches my sketch

☐ size is reasonable

☐ I added the starting position

☐ units on every number

NEXT STEP

I have completed ____, supported by ____. My next step is ____ because ____.

TRANSFER 1 2 3

UNIT 1 COLOR CODE ☐ green speeding up ☐ red slowing down ☐ yellow steady · balanced ☐ blue position · displacement ☐ purple velocity ☐ orange forces pencil · everything else

Transfer-task planning board

21 D

DIRECTIONS · Complete any three in a row to build your plan. These support — not replace — the assigned task.

DRAW Sketch the situation with a reference point and axes.	**CALCULATE** List every given value with its unit.	**EXPLAIN** Which model fits: steady v or constant a? Why?
REAL WORLD What does the range in the task mean for a decision?	**CHALLENGE ★** Write the full chain of equations you'll need, in order.	**CALCULATE** Do your first calculation, one quantity per line.
EXPLAIN What does the model leave out?	**DRAW** Split the velocity arrow into east and north parts.	**REAL WORLD** Who would use your prediction, and what do they need from it?

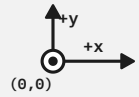

Three in a row: _____ · The square that taught me most: _____

TRANSFER 1 2 3

UNIT 1 COLOR CODE ☐ green speeding up ☐ red slowing down ☐ yellow steady · balanced ☐ blue position · displacement ☐ purple velocity ☐ orange forces pencil · everything else

Picture dictionary: transfer task

Language goal: I can **plan** a solution.

⊙ (0,0)

reference point

punto de referencia · ponto de referência

where we measure from

my language: _____

use it: _____

v = 8,500 m/s

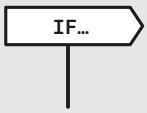

given

dato · dado

a value we know

my language: _____

use it: _____

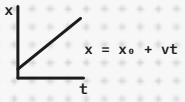

assumption

suposición · suposição

what we pretend is true

my language: _____

use it: _____

x = x₀ + vt

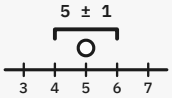

model

modelo · modelo

the math we use

my language: _____

use it: _____

5 ± 1

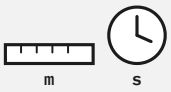

range

rango · intervalo

lowest to highest

my language: _____

use it: _____

m · s · m/s

units

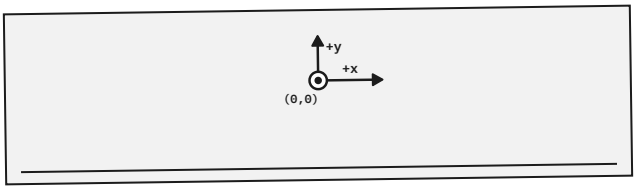

unidades · unidades

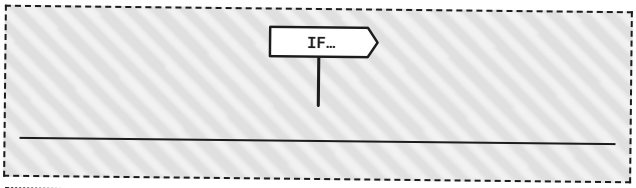

what each number measures

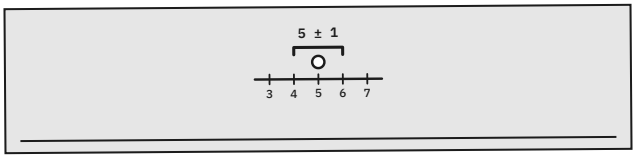

my language: _____

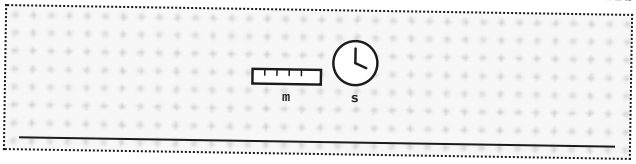

use it: _____

MATCH · WRITE THE WORD FOR EACH PICTURE

I can point and say all 6 words to a partner ☐

TRANSFER 1 2 3

UNIT 1 COLOR CODE ☐ green speeding up ☐ red slowing down ☐ yellow steady · balanced ☐ blue position · displacement ☐ purple velocity ☐ orange forces pencil · everything else

Say it, then write it: make a plan

Language goal: I can **explain** my plan.

reference point
punto de referencia · ponto de referência
the zero we measure from

given
dato · dado
a number we are told

assumption
suposición · suposição
what we treat as true

step
paso · passo
one part of the plan

English · Spanish · Portuguese. My home language: _____

1 · READ AND FILL · WORD BANK: reference point · given · assume · first · then

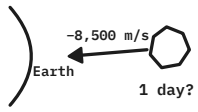

I mark my ____ as zero. I list each ____ with its units. I name what I ____, like steady velocity. ____ I find the change. ____ I add the starting position.

2 · SAY IT TO A PARTNER, THEN WRITE IT

My reference point is ____ and + points ____ .
I assume ____ because ____ .

3 · SOLVE WITH THE STEPS

2026-XJ is 1.2 × 10⁹ m from Earth and moves 8,500 m/s toward Earth. Plan how to find where it is after 1 day.

STEP 1 · UNITS
1 day = ____ s

STEP 2 · CHANGE
Δx = ____ × ____ = ____ m

STEP 3 · SAY IT
"After 1 day it is ____ m from Earth."

4 · EXPLAIN IT · CHOOSE A FRAME

☐ My first step is ____ because ____ .
☐ I assume ____ ; if that is wrong, ____ .
☐ First ____, then ____, so ____ .

I said it ☐ · I wrote it ☐

TRANSFER 1 2 3

UNIT 1 COLOR CODE ☐ green speeding up ☐ red slowing down ☐ yellow steady · balanced ☐ blue position · displacement ☐ purple velocity ☐ orange forces pencil · everything else

VOL. 1 · NO. 21 · TRANSFER REPORTER: _____

The 2026-XJ Daily

Press release draft: what we know so far

HEADLINE (no final answers yet — what is the plan?)

THE STORY

Describe the situation, the evidence you were given, and the model you will use.

WHAT WE WILL MEASURE / CALCULATE

1. ____
2. ____
3. ____
4. ____

SKETCH FOR READERS

LIMITS OF THE MODEL

What could make our prediction wrong?

EDITOR'S NOTE TO MYSELF

Tomorrow I still need to ____ .

UNIT 1 COLOR CODE ☐ green speeding up ☐ red slowing down ☐ yellow steady · balanced ☐ blue position · displacement ☐ purple velocity ☐ orange forces pencil · everything else

Plan it with the crew

21 R

DIRECTIONS · The crew is starting the transfer task. Reply with planning moves — not answers.

XJ-7 transfer team

ELI

ok where do we even start

YOU ① first move

MAZ

we have like 6 numbers. do we just multiply them?

YOU ② sort the givens

NADIA

steady velocity or constant acceleration?

YOU ③ choose a model

ELI

my answer is negative. did we mess up?

YOU ④ check it

SHOW YOUR RECEIPTS

① sketch + reference point

② quantity · value · unit

③ my assumption and why

④ direction, size, start

TRANSFER 1 2 3
