Name what is doing the pushing or pulling

GUIDED NOTES / use with the projected diagram Name _____

A SAY THE WORD

Interaction / ES: interacción / PT: interação

Every force has a source (what pushes or pulls) and a receiver.

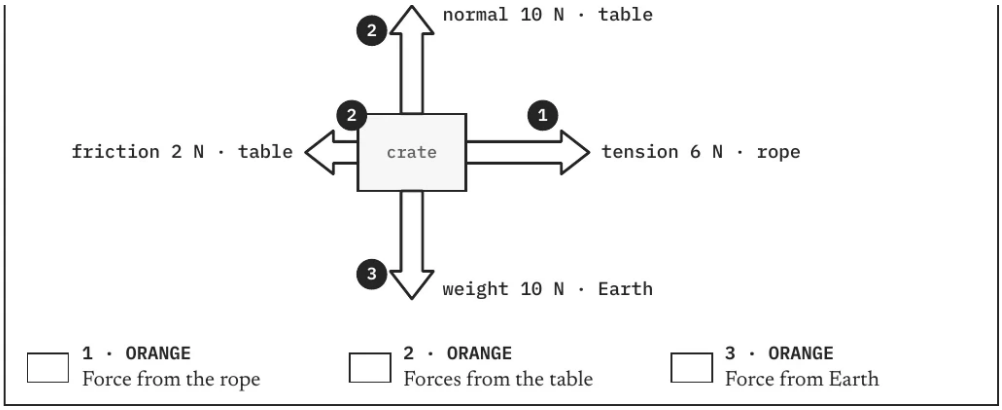

Also on your note page: Contact force, Non-contact force, Mass vs. weight.

B READ THE RELATIONSHIP

An interaction has two objects. One object exerts a force on the other.

Weight = mass × gravitational field strength

C TRACE THE ORIGINAL FIGURE

Use the numbered key. Trace one feature. Tell your partner what it means.

D FOLLOW THE WORKED EXAMPLE

A 3 kg object rests on a level table. Find its weight and name the force that supports it.

Given m = 3 kg g ≈ 10 N/kg

Rule W = m × g

Work W = 3 × 10 = 30 N down table pushes up equally

Answer 30 N normal force 30 N up

E SAVE FOR THE FINAL MEETING

If XJ's path ever bends or speeds up, something is pulling on it. Naming the source of every force (out there, mostly gravity) is how analysts explain a change.

Read the physics: Interaction

SUPPORTED READING / read one part, then point to the evidence Name _____

01 PICTURE IT

Ask: Which object receives the force? What other object pushes or pulls it? A rope pulls by contact. Gravity pulls even without contact.

02 HOW IT WORKS

Mass is measured in kilograms. Weight is a force in newtons. On Earth, multiply mass by gravitational field strength to find weight. Earth pulls downward; a table pushes perpendicular to its surface.

03 WHAT TO CHECK

A rope may carry part of a crate's weight. If the crate stays at rest, all upward forces together balance the downward force.

04 TRY THE EXAMPLE FROM YOUR NOTES

A 3 kg object rests on a level table. Find its weight and name the force that supports it. 30 N normal force 30 N up.

05 CONNECT TO XJ

If XJ's path ever bends or speeds up, something is pulling on it. Naming the source of every force (out there, mostly gravity) is how analysts explain a change.

SAY IT BEFORE YOU WRITE

Who exerts the force, and on what object? The ___ exerts a force on the ___ toward ___.

Frayer models

SECTION A / VOCABULARY Name _____

Say your idea in any language. Write, draw, or label it in the box.

Interaction

ES: interacción / PT: interação

Meaning in my words	How can you tell?
How would you explain interaction to a friend? In my words, this means ___.	In “the rope pulls the crate,” which two objects are interacting? I can tell because ___.
Example or sketch	**Non-example and why**
What interaction holds up a book resting on a table? My example shows ___.	Someone names “moving right” as the object pushing a cart. What would you ask? I would change ___ because ___.

Contact force

ES: fuerza de contacto / PT: força de contato

Meaning in my words	How can you tell?
How would you explain contact force to a friend? In my words, this means ___.	Which detail tells you the table’s push on a book is a contact force? I can tell because ___.
Example or sketch	**Non-example and why**
Draw the force a compressed spring exerts on a cart touching its right end. My example shows ___.	Earth pulls on a falling ball after it leaves your hand. Is that a contact force? I would change ___ because ___.

Frayer models

SECTION A / VOCABULARY Name _____

Say your idea in any language. Write, draw, or label it in the box.

Non-contact force

ES: fuerza a distancia / PT: força à distância

Meaning in my words	How can you tell?
How would you explain non-contact force to a friend? In my words, this means ___.	A magnet tugs a paper clip before they touch. How can you tell contact is unnecessary? I can tell because ___.
Example or sketch	**Non-example and why**
Which downward arrow belongs on a ball after you let go? My example shows ___.	A hand holds up a book. Which force disappears when the hand moves away? I would change ___ because ___.

Mass vs. weight

ES: masa y peso / PT: massa e peso

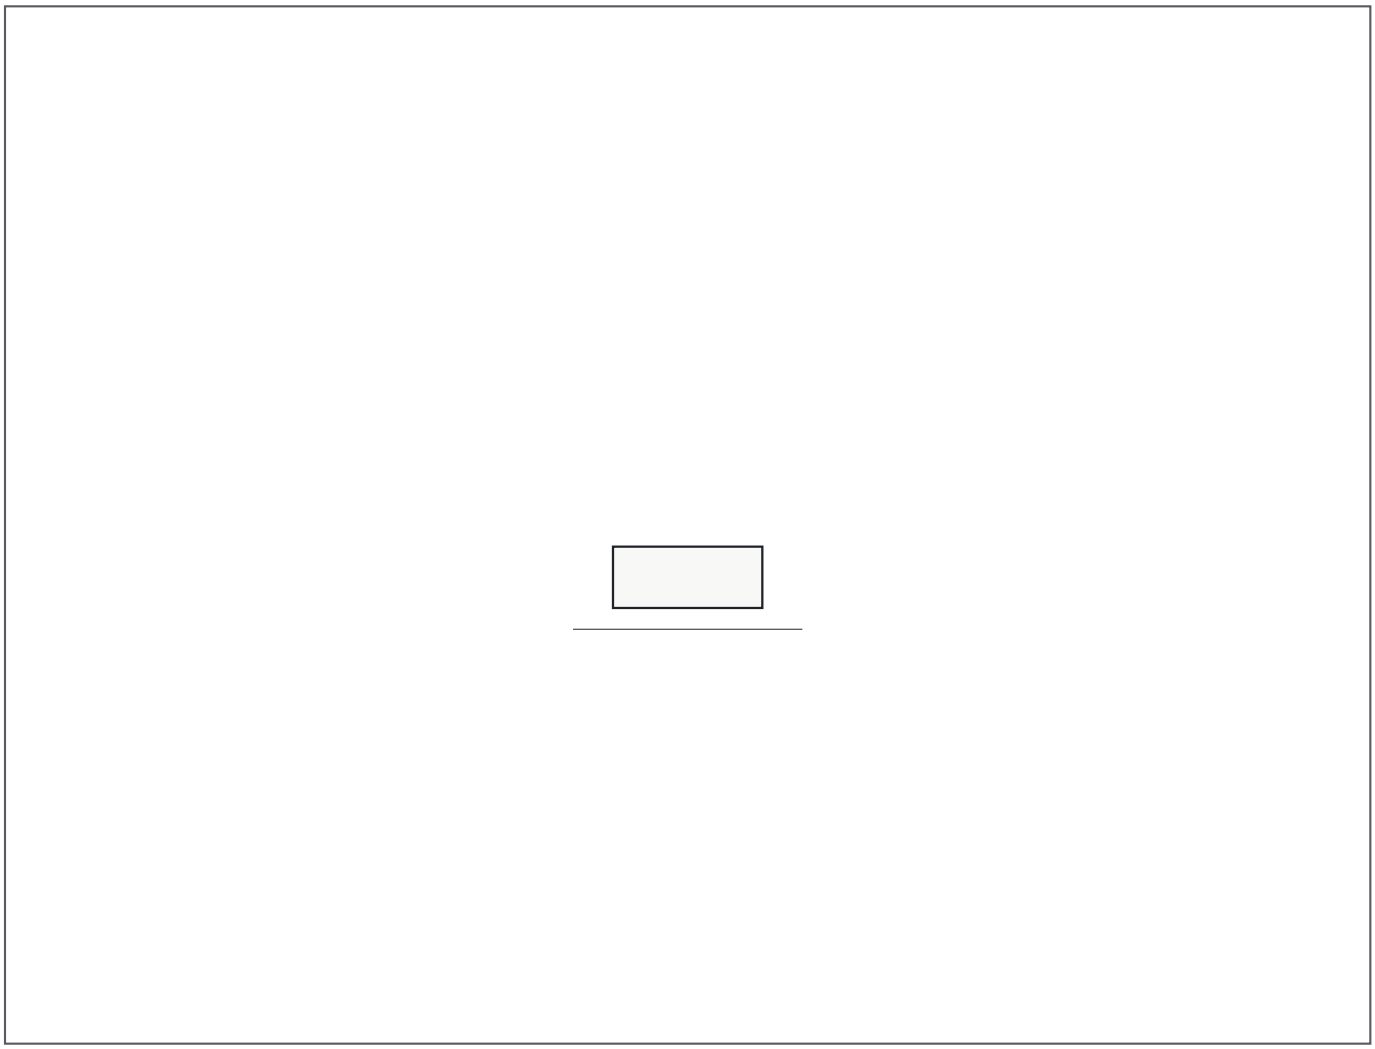

Meaning in my words	How can you tell?
How would you explain the difference between mass and weight? In my words, this means ___.	What changes when you take the same cart to the Moon: its mass or its weight? I can tell because ___.
Example or sketch	**Non-example and why**
On Earth, use 10 N/kg. What are the mass and weight of a 2 kg cart? My example shows ___.	A label says “mass = 20 N.” What does the unit tell you? I would change ___ because ___.

Doodle the idea

SECTION B / DRAW WITH YOUR TEACHER Name _____

Draw Earth and a crate. Put weight on the crate; label source, receiver, direction, and N.

Labels you can use: source · receiver · contact.

Tell a partner

The ___ exerts a force on the ___ toward ___.

On assignment: Interaction

SECTION E / BACK / FINAL MEETING ONLY Name _____

An XJ animation shows gravity from Earth and a forward arrow labeled “because it moves.” The graphics desk needs approved force labels.

PICK A JOB / DELIVER ONE PRODUCT

☐ **Simulation engineer**

Prepare the force layer for XJ. Name a source and receiver for each arrow you keep. Put motion on a separate layer.

☐ **Science graphics editor**

Sketch the graphic viewers will see. Have your producer challenge the source of each arrow before you approve its label.

Word bank: source · receiver · contact.

Try: “Our desk recommends ___. This mark shows ___.”

One partner makes the graphic; one delivers the first call. Show your evidence to the crew or the audience.

OUR GRAPHIC / COMMAND OR ON-AIR CUE

INCOMING UPDATE / WAIT FOR YOUR TEACHER

Listen to the new report. Switch speakers. Keep or change your call; point to the new evidence.

“We first said ___. Now we ___ because ___.”
