Frayer models

SECTION A / VOCABULARY Name _____

Find the word on the screen. Talk it through with your partner, then write or sketch in its four boxes.

Quantity

Meaning in my words	How can you tell?
What do physicists mean by a quantity?	Two labels say 4 m and 4 m/s. What different questions could they answer?
Example or sketch	**Non-example and why**
What label would make "−3" into a useful velocity reading?	A student writes "force = 6 m." What clue tells you to check their work?

Sign

Meaning in my words	How can you tell?
How would you explain sign to a friend?	If right is positive, what sign goes on a 3 N force left?
Example or sketch	**Non-example and why**
How would you label a leftward velocity of 2 m/s when right is positive?	Does a negative velocity by itself mean the cart is slowing down?

Frayer models

SECTION A / VOCABULARY Name _____

Find the word on the screen. Talk it through with your partner, then write or sketch in its four boxes.

Force

Meaning in my words How would you explain force to a friend?	**How can you tell?** When your hand pushes a cart, what pushes and what receives the push?
Example or sketch Which force arrow would you draw while a hand pushes a cart right?	**Non-example and why** The hand lets go and the cart keeps rolling. Is the hand still pushing it?

Check

Meaning in my words How would you explain check to a friend?	**How can you tell?** You found displacement using an equation. What feature of a velocity–time graph could check it?
Example or sketch A cart stays at +3 m/s for 2 s. How can a graph check the result of 6 m?	**Non-example and why** Someone copies the same number twice. What could actually catch a wrong answer?

Doodle the idea

SECTION B / DRAW WITH YOUR TEACHER Name _____

Draw a force sum that includes a leftward force. Circle the first place where losing the sign would change your answer.

First wrong step

Repair

My marks mean

On assignment: Sign

SECTION E / BACK / FINAL MEETING ONLY Name _____

A calculator overlay for a 3 kg tracker shows +9 N and −3 N. Its output is "9 ÷ 3 = 3 m/s².” It is about to go live.

PICK A JOB / DELIVER ONE PRODUCT

☐ **Software tester**

File a bug ticket: mark the first wrong step, enter the corrected force sum and give the expected display.

☐ **Fact-check producer**

Stop or clear the graphic. Give the anchor a corrected number and a short reason viewers can check on the force arrows.

One partner makes the graphic; one delivers the first call. Show your evidence to the crew or the audience.

OUR GRAPHIC / COMMAND OR ON-AIR CUE

INCOMING UPDATE / WAIT FOR YOUR TEACHER

Listen to the new report. Switch speakers. Keep or change your call; point to the new evidence.

Editor's check: Give a new pair of forces that exposes the same error.
