Frayer models

SECTION A / VOCABULARY Name _____

Find the word on the screen. Talk it through with your partner, then write or sketch in its four boxes.

Claim

Meaning in my words How would you explain claim to a friend?	**How can you tell?** Which part of your forecast tells the listener exactly what you expect?
Example or sketch Make a claim for a cart moving steadily east at 2 m/s from the origin.	**Non-example and why** “Here are my three readings.” What is still missing from your report?

Evidence

Meaning in my words How would you explain evidence to a friend?	**How can you tell?** What reading supports the claim that the cart reached 4 m in 2 s?
Example or sketch How could two measurements support a claim that one cart accelerated more?	**Non-example and why** “I expected our cart to win.” Does that tell us which cart crossed first?

Frayer models

SECTION A / VOCABULARY Name _____

Find the word on the screen. Talk it through with your partner, then write or sketch in its four boxes.

Limitation

Meaning in my words How would you explain limitation to a friend?	**How can you tell?** Why would two positions a minute apart tell you little about motion an hour later?
Example or sketch Name one condition that could make a straight-line forecast for XJ unreliable.	**Non-example and why** “Our answer is bad.” How could that become a useful limitation?

Revision

Meaning in my words How would you explain revision to a friend?	**How can you tell?** Your predicted sighting is +6 km and the new image reads +5 km. What would you update?
Example or sketch What would you tell the next crew after that sighting?	**Non-example and why** A team changes its answer only because another team disagrees. What would justify the change?

Doodle the idea

SECTION B / DRAW WITH YOUR TEACHER Name _____

Doodle two forecast bands on the same scale. Add a note connecting the revision to a specific measurement.

Choose zero, direction, and scale.

My marks mean

Would you air this headline?

22

SECTION E FINAL MEETING / TEAM TRANSFER

Name _____ Partner _____

Our goal: Compare forecast ranges and keep conclusions within the data.

CHOOSE ONE JOB TOGETHER

FORECAST ENGINEER ☐

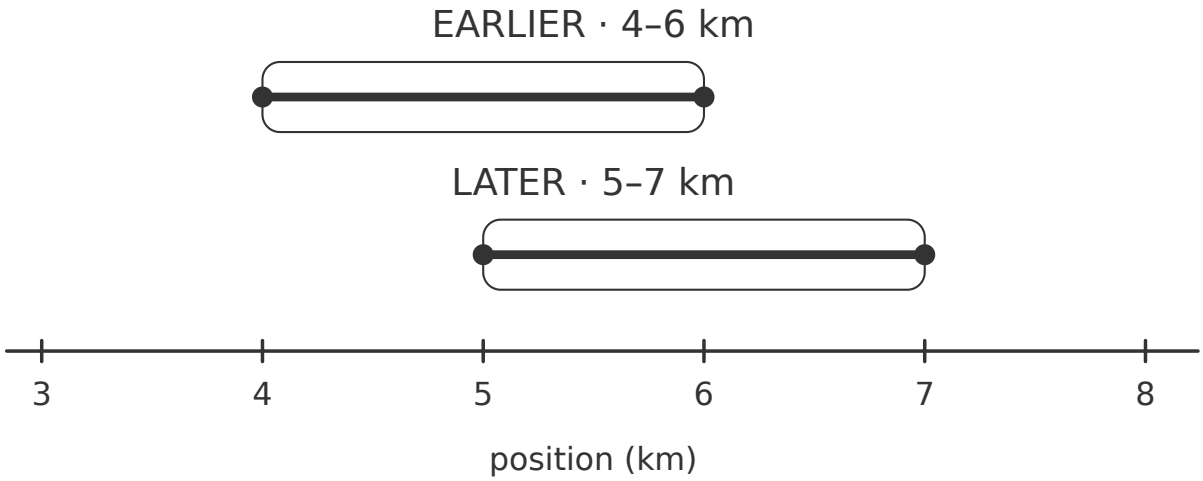

Mark both forecast bands. Issue a location bulletin and name an observation that would trigger another update.

SCIENCE NEWS EDITOR ☐

Decide whether to air the headline. Show both intervals and write the replacement line viewers should hear.

Point to a clue. Keep your first marks; add the update using the color key.

Two short-interval forecasts in the same frame give **4-6 km** and **5-7 km**. The new estimate uses a later sighting. A headline says “Impact confirmed.”

01 OUR FIRST CALL

What location can you report? Should the proposed headline air? Explain.

02 OUR REVISED CALL

Wait for the reveal. Keep your first call.

New clue: _____

Answer the caller using the bands. What can your desk report, and what is still unknown?

Switch speakers. What do the bands actually tell us?

☐ GREEN	☐ RED	☐ YELLOW	☐ BLUE	☐ PURPLE	☐ ORANGE	☐ PENCIL
