Diagnose, repair, recheck

antocciphysics

Name: _____ **Block:** _____ (teacher only) **Mastery Rating:** _____

LEARNING TARGET Identify a reasoning error and demonstrate the repaired method on a new problem.

SUCCESS CRITERIA - I can...

1. Locate the first incorrect step.
2. Show a corrected method with units.
3. Apply the repair to a different problem.

Core: teacher selects from 1-7. **Stretch:** 8 after checking your work.

MARZANO SELF-CHECK

① Need help starting

② Can do part; need help

③ Solve and explain with allowed supports

01 Bring back an earlier idea

A 3 kg cart moves left at 5 m/s. Forces are 26 N right and 5 N left. Find acceleration and whether its speed initially rises or falls.

Marzano check - circle: ① ② ③

02 Explain a worked example

Reference: $a = \Sigma F/m$; $v_f = v_i + a\Delta t$.
For a constant-acceleration interval. Check signs, units and assumptions; keep the original step visible when revising.

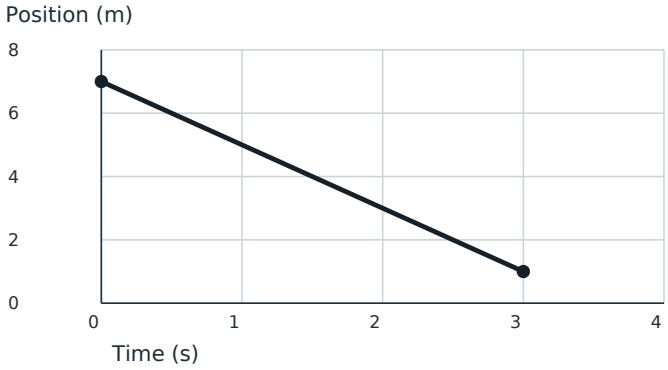

Worked reasoning: Claim: a car moving east must accelerate east. Counterexample: it moves east while braking, so acceleration points west. A single valid counterexample can disprove a universal claim.

Your turn: Draw velocity and acceleration arrows for that counterexample. Write a corrected statement about their directions.

Marzano check - circle: ① ② ③

03 Position is not velocity

A straight position graph goes from 7 m to 1 min 3 s. A student writes“velocity=1 m/s becauseitendsat 1 m.”Correct the method and answer.

Marzano check - circle: ① ② ③

04 Net force is not one force

A 4 kg cart has 18 N right and 6 N left. A student calculates 18÷4. Explain what is missing and fix it.

Marzano check - circle: ① ② ③

Diagnose, repair, recheck

antocciphysics

05 New evidence

Try both fresh checks: A cart goes from 10 m to 2 m in 7 s; find velocity. A 5 kg object has 7 N right and 22 N left; find acceleration. Show your methods.

Marzano check - circle: 1 2 3

06 Choose a method

A cart travels west at 14 m/s and west at 5 m/s 4 s later. Is it speeding up? Find acceleration size and direction.

Marzano check - circle: 1 2 3

07 Exit check

Choose one error from 3 or 2. Explain what you changed, point to your fresh check in 5, and name one part you can now do independently.

Marzano check - circle: 1 2 3

08 STRETCH: Apply it another way

Invent a wrong statement about force or motion, then draw a specific case that disproves it. State the corrected rule.

Marzano check - circle: 1 2 3
